Hi Folks'

The EPA would like to have a discussion on the path forward on the migration of the contaminate plume off-site. Proposed dates are November 1 and 3, 2016, between 8 am. and 3 pm. On the November 3, I have a meeting between 9 and 10 am. other than that I have an open schedule.

Proposed Agenda:

1. Current data and information on the migration of the contaminate plume off-site.
2. What to do to protect the Ex. 6 Personal Privacy (PP) Well? The leading edge of the plume is within a few hundred feet of the Ex. 6 Personal Privacy (PP) well. Replace? Begin remediation at the Ex. 6 Personal Privacy (PP)?
3. Human Health effects on workers and fauna and flora at the nursery if exposed to the COC? How to protect the Ex. 6 Personal Privacy (PP) workers, fauna and flora.
4. Start of the contingency plan on the contaminate plume. The off-site plume is within 1,000 feet of **Residential Drinking Water wells**.
5. Next steps.

Mr. Ruopp please arrange a conference call in number. Please let me know the availability for the times and dates of the conference is best. Propose other dates and times for the meeting. If you have any questios please contact me.

Respectfully,

John Nordine, CPG, LPG
